001 Choose the desired location for your calendar.

002 Place the calendar against the wall and use a level to ensure it is perfectly straight.

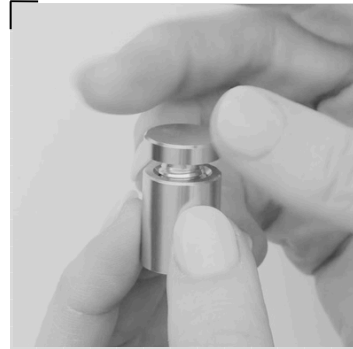

003 Using the hole-marking tool or pen, mark the mounting hole locations on the wall.

004 Drill holes at the marked locations and insert the appropriate wall anchors if required. Drill holes suitable for your wall type (**drywall: 8.5mm, masonry wall: 8mm**) and insert the anchor.

005 Insert the supplied wall anchors if required for your wall type.

006 Separate the standoff cap from its base.

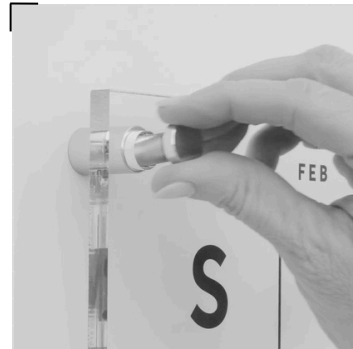

007 Insert the screw through the base.

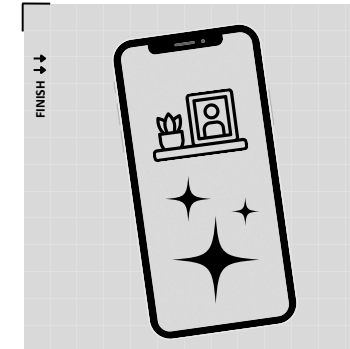

008 The standoff cap should look like this before installation.

009 Secure the standoff base to the wall using the appropriate screw and anchor.

010 Align the mounting holes in the calendar with the installed standoffs. Insert the standoff caps through the holes and loosely tighten them into the bases.

011 After all caps are installed, tighten them fully by hand. Your calendar is now ready to use.

Rad Tips

① Studs & Blocking

- Installation is recommended with two people.
- If a wall stud is available, mount directly into the stud and do not use an anchor.
- Do not overtighten the standoff caps, as this may damage the acrylic panel.

Important: For safety and optimal results, installation must be carried out by two people.
