

Hofina Nighthstand with LED Install Guide

Required Installation Tools:

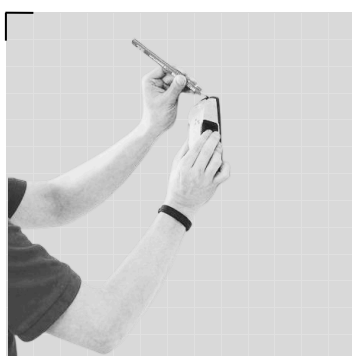

What's Included:

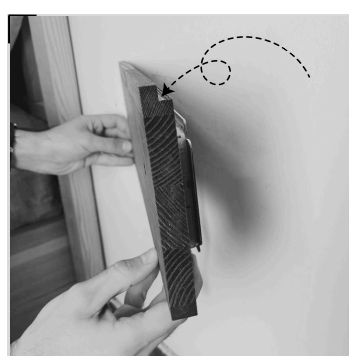

001

First: Determine your desired location for your nightstand.

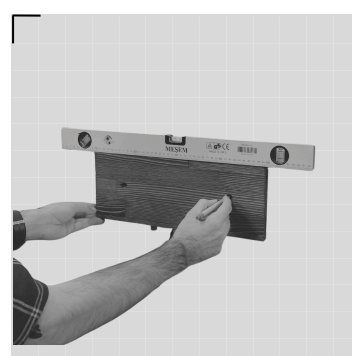

002

Use a stud finder and pencil to mark the studs.

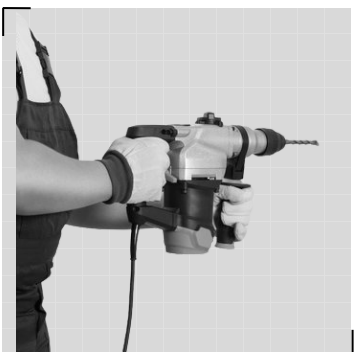

003

Ensure the notched part is at the top and the metal part faces the wall.

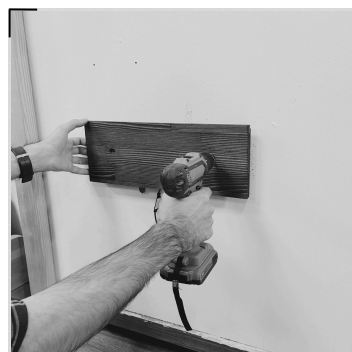

004

Make sure the bracket is level using a spirit level. Mark the hole positions on the bracket and ensure it is secured to at least one stud.

005

If you're not mounting the bracket to a stud, use wall anchors. Drill holes based on your wall type (drywall: 8.5mm, masonry: 8mm) and insert the anchors.

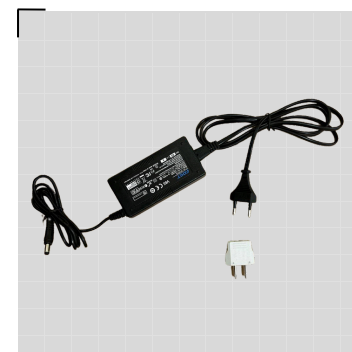

006

Secure the bracket to the wall using screws appropriate for your wall type.

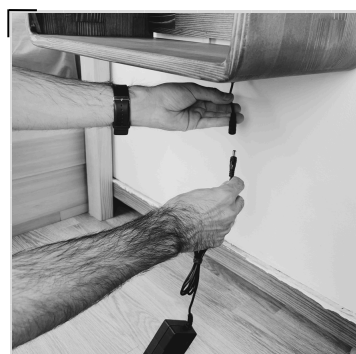

007

Place the nightstand onto the bracket's notch.

008

Connect the adapter and plug converter securely.

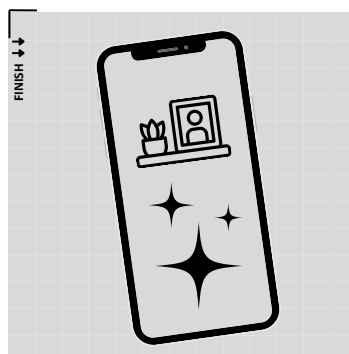

009

Attach the adapter to the nightstand plug.

010

Please kindly plug the adapter with the plug converter into the outlet.

011

Congratulations! You've completed the project and deserve all the praise. Share a picture with us on Instagram at [@hofinashop](https://www.instagram.com/hofinashop) for a chance to win some awesome prizes!
